Prior Notice:
Subject: Roosevelt and Plymouth South recall advisory and OFO

Notice Text:

Effective Gas Day April 3, 2020 and until further notice, Northwest is issuing an OFO Recall Advisory and Operational Flow Order (OFO) through the Roosevelt compressor and Plymouth South constraint location pursuant to Section 14.15(d) of its Tariff.

Under the OFO Recall Advisory, Shippers are required to: (1) recall capacity that is subject to an OFO recall provision; or (2) take other action that is acceptable to Northwest, to satisfy its OFO obligation.

If the northbound scheduled quantities exceed the greater of

Northwest's design capacity of 546,000 Dth/d at Roosevelt or 536,300 Dth/d at the Plymouth South constraint, or the operationally available at those locations on that day, Northwest will provide Shippers with their specific OFO obligations by 4:00 p.m. MST. Shippers must comply with their OFO obligations no later than the Evening nomination deadline (5:00 p.m. MST).

Additionally, Northwest would like to remind customers that with Dominion's annual withdrawal test and outage at Clay Basin scheduled for April 4-15, Northwest has very limited flexibility to handle banking or drafting in the mid-section.

Shippers can monitor throughput quantities and obtain a copy of Northwest's OFO procedures on Northwest's website at www.northwest.williams.com.

If you have any questions, please contact your Marketing Services Representative or the Scheduling Hotline at (801) 584-7301.
