OPERATIONS	
Job Title	Job Description
Vice President, Operations & Engineering	Leads the operations, engineering, integrity management, safety, SCADA and land and environmental functions.
Vice President, Operations & Gas Control	Directs operations, operations control, measurement, hydraulic modeling, and SCADA.
Vice President, Engineering & Integrity	Manages the design, engineering, construction, documentation, and system selection of all projects assigned to the engineering department, and manages the risk management and integrity management programs.
Director, Operations Control & Analysis	Directs the monitoring and control of the daily pipeline and measurement operations including the physical flow of gas on the system. Manages 24-hour, SCADA, pipeline surveillance and emergency control center functions and is responsible for the hydraulic modeling and gas measurement functions.
Gas Control Supervisor	Provides first-line supervision to Kern River's gas control group and back up to the manager of the operations control and analysis department. Primary function of this position is to supervise complex 24-hours-a-day remote pipeline operations as well as responsibility for managing Kern River's compliance with the U.S. Department of Transportation (DOT) regulation 49 CFR 192.631 Control Room Management/Human Factors (CRM) program.
Gas Controller (all levels)	Controls and monitors the operation of the transmission system via electronic systems. Notifies personnel regarding day-to-day operational response and emergency response efforts.
Engineer (all levels)	Provides natural gas hydraulic modeling using pipeline simulation software to support the development, cost estimating, operation, and maintenance of Kern River's gas transmission facilities. Investigates, analyzes, and evaluates pipeline operations and develops improvement recommendations.
Measurement Analyst (all levels)	Provides review and corrects real time measurement data to ensure the data is custody transfer quality. Uses the gas measurement system to perform monthly measurement close, reconcile gas balance and satisfy data requests. Responsible for investigating, analyzing, and recommending solutions to gas measurement concerns.
Technical Specialist (all levels)	Provides overall accurate and timely gas measurement by monitoring gas measurement activities and communicating proactively with internal and external customers to resolve any relevant gas measurement issues. Incumbent serves as the company's top technical expert in the area and shares knowledge, provides training and serves as a mentor to other gas measurement employees.
