 Subject: Kern River - Goodsprings Compressor Station Controls Upgrade Project

Notice Text:

Kern River will upgrade the controls system at its Goodsprings compressor station beginning Thursday, March 4, 2021, through Monday, March 8, 2021 - the station will be out of service for the duration of the project. All other facilities on the system will not be impacted by the project. Kern River requests that all customers align daily scheduled nominations with physical receipts and deliveries to ensure Kern River's line pack and system integrity are maintained.

During the project the operating capacity will be below the primary firm contracted capacity; however, historical scheduled quantities and nomination patterns indicate only interruptible and secondary firm service to be impacted. Kern River reminds its customers to submit their nominations in the Timely cycle, or as early as possible, to optimize priority of service.

The information below illustrates the anticipated Goodsprings operating capacity and the primary firm contracted capacity during the upgrade project (March 4-8, 2021), and average daily scheduled quantities during the same period in 2019 and 2020. The Goodsprings operating capacity is subject to change based on shipper nomination patterns and system conditions.

March 4-8, 2021	1,452,000 Dth/d - Operating Capacity
	1,717,976 Dth/d - Primary Firm Contracted Capacity
March 4-8, 2020	1,316,815 Dth/d - Primary Firm Scheduled
	1,495,338 Dth/d - Total Scheduled (includes all services)
March 4-8, 2019	1,217,119 Dth/d - Primary Firm Scheduled
	1,605,576 Dth/d - Total Scheduled (includes all services)

Kern River encourages its customers to consider alternative delivery points upstream of the Goodsprings compressor station located in Kern River's Utah and Nevada market areas in the event nominations are impacted by the reduced

operating capacity during the project.

Please review the important information that is posted to Kern River's Daily Operational Report at <https://services.kernrivergas.com> and contact your Marketing & Customer Services representative or the Customer Services Hotline at 801-937-6111 should you have questions.
