Subject:	Southwest Gas Posts Notice

Notice Text:

Southwest Gas Corporation (Southwest Gas) is issuing a Stage 1 Operational Flow Order (OFO) for Southern Nevada due to continuous excessive packing by transportation customers. Southwest Gas requires that transportation customers in Southern Nevada closely monitor their nominations and scheduled quantities versus usage. Southwest Gas requires that the daily positive imbalance be less than or equal to 7% of scheduled quantities or 5,000 therms, whichever is greater, in accordance with Section 6.9 of Schedule No. ST-1/NT-1 of its Nevada Gas Tariff No. 7, or as otherwise stated per contract terms. The tolerance stated above may be adjusted if pipeline conditions change. Customers who create an imbalance in excess of the daily tolerance stated above will be assessed daily excess imbalance charges and may be subject to non-compliance charges.

If you have any questions concerning this information, please contact your gas scheduling representative or your Key Account Management representative.
