Notice Text:

STRAINED OPERATING CONDITION (SOC) Declaration - System Wide DRAFT

EFFECTIVE DATE: June 3, 2026

IMBALANCE TOLERANCE: 5%

DURATION: Until Further Notice

AFFECTED AREAS/LOCATIONS: System-wide

OPERATING CONDITION SUMMARY: The EPNG system linepack is currently at 7,600 MMcf which is a decrease of 267 MMcf compared to the start of Gas Day June 2, 2026. The linepack draft is primarily

due to a loss of supply in the Permian Basin related to overnight thunderstorms. The Permian Basin supply is currently performing at 91% of scheduled volumes.

CUSTOMER ACTION REQUIRED: Customers are strongly encouraged to review their transport to ensure that their deliveries are in balance with their supplies and to ensure their scheduled supplies are performing as expected.

EPNG RESPONSE:

Washington Ranch is on withdrawal.

Imbalance payback off the system, such as Payback (Imbalance Payback from TSP), will be denied due to operational concerns related to maintaining adequate linepack.

IHSW Service will be suspended.
