Southwest Gas Notification

Subject: 07-15-2026 - SNV - Stage 1 OFO - Low Line Pack

Notice Text

Southwest Gas Corporation (Southwest Gas) is issuing a Stage 1 Operational Flow Order (OFO) for Southern Nevada due to low line pack conditions on Kern and continued excess drafting. Southwest Gas requires that transportation customers in Southern Nevada closely monitor their nominations and scheduled quantities versus usage. Southwest Gas requires that the daily negative imbalance be less than or equal to 7% of scheduled quantities or 5,000 therms, whichever is greater, for customers who operate in accordance with Section 6.9 of Schedule No. ST-1/NT-1 of its Nevada Gas Tariff No. 7.

The tolerance stated above may be adjusted if pipeline conditions change. Customers who create an imbalance in excess of the daily tolerance stated above will be assessed daily excess imbalance charges and may be subject to non-compliance charges.

If you have any questions concerning this information, please contact your gas scheduling representative or your key account management (KAM) representative.
